Subject Index

A

Abscisic acid
  actin reorganization induced by, in dayflower guard cells, 2120
  protein phosphatase induced by, in beechnut seeds, 1949
  and reactive oxygen intermediate release in radish seeds, 1591
  and stoma and leaf gas in *Tradescantia virginiana*, 935
Acer negundo, stems of, cavitation fatigue in, 779
Acer pseudoplatanus (*see* Sycamore)
Acetabularia acetabulum, carbonic anhydrase in, 900
N-Acetylglucosamine, in carrot embryogenesis, 1880
Acid phosphatase
  induction by phosphorus starvation in tomato, 728
  induction in bean leaves, phosphorus adaptation and, 1901
Acidification capacity of cell walls, in maize leaf elongation inhibition by salinity, 1419
Actin-depolymerizing factor, in wheat cold acclimation, 360
Adenine, tobacco bud development and, 1546
Adenosine kinase, in maintaining methylation during salt stress in spinach, 856
Adenylate transporter activity, effect on physiology and starch properties of potato tubers, 1667
ADP-glucose pyrophosphorylase, cytosolic, in graminaceous endosperms, 818
Aesculus hippocastanum, petioles of, cavitation fatigue in, 779
Agricultural efficiency, in saving wilderness, 174
Agrobacterium, in transformation of plant cells, 9
Alamethicin, ion channel-forming, in lima bean jasmonate and salicylate signaling, 369
Algae (*see also* specific plant)
  brown, oxidative burst in, oligoguluronate-elicited, 278
  green
    carbonic anhydrase in, 900
    stress-induced astaxanthin biosynthesis in, 810
Allene oxide synthase, oxylipin-metabolizing, in tomato chloroplasts, 306
Alnus incana, stems of, cavitation fatigue in, 779
Aluminum
  anion channels induced by, in maize, 292
  induction of vacuolar ATPase and mitochondrial ATP synthase by, in aluminum-resistant wheat, 2068
  malate-permeable and cation channel activation by, in wheat roots, 1459
  pea root elongation inhibition and, 199
  signalgrass resistance to, 1473
Aluminum toxicity, bean root border cells and, 1978
Amino acids
  accumulation in maize endosperm, genetic analysis of, 1542, 1766, 1778
  biosynthesis of, in maize kernels, 1178
  transport in Arabidopsis, *ANT1* and, 1813
  xenobiotic synthesis with, for fava beans, 1620
Ammonia compensation point, in *Luzula sylvatica*, gas exchange and bioassay determinations of, 476
Ammonium, cytosolic concentrations and transmembrane fluxes of, in bean leaves, 523
Amylopectin maturation, *Chlamydomonas* isoamylases and, 1723
Amyloplast sedimentation, in *Ceratodon purpureus* protonemata, 1542, 2085
Amyloplast stroma, in maize, plastidic starch phosphorylase in, 351
Anaerobic stress, cytoplasmic pH changes during, in sycamore, 912
Anion channels, aluminum-induced, in maize, 292
Anoxia, maize root tip death induced by, sucrose synthase in, 585
ANT1, in amino acid transport in Arabidopsis, 1813
Antarctica, vascular plants in, effects of solar UV-B radiation and ozone hole on, 508, 738
Antimycin A, photosynthesis sensitivity to, in tobacco chloroplasts, 1919
Antirrhinum majus (*see* Snapdragon)
Aphid feeding, Arabidopsis defense pathways and, 1074
Apical dominance, auxin and, in fava bean, 1546
Apical hook formation, in Arabidopsis, cell division in, 172, 219
Apoptosis
  cryptogen-induced, in tobacco, 564
  in development and defense, 94
  induction by DNA-damaging agents, in peas, 752
  nuclear degradation triggered by vacuole rupture during, in zinnia, 507, 615
Apyrase genes, in *Medicago truncatula*, 2104
Aquaporins
  in maize, 1206
  water relations and, 135
Arabidopsis
  amino acid transport in, *ANT1* and, 1813
  apical hook formation in, cell division in, 172, 219
  biotin carboxyl carrier protein tissue-specific expression in, 2016
  chloroplast and mitochondrial proteases in, nomencla for, 1912
  chloroplasts of
    biogenesis of, 142
    protein import by, 1567
  cold acclimation of, *RCI2A* and *RCI2B* regulation in, 1655
  defense pathways of, aphid feeding and, 1074
  floral development in, genes in, 1788
  gene family knockouts in, 513
  genomic sequencing of, 1155, 1166
  germination in, brassinosteroids in, 763
  glutamate-gated calcium fluxes in, 1139
  hypocotyl and stem of, ethylene response mutants in, 507, 1061
  isoaspartyl methyltransferase biochemical properties in, 1023
  leaves of, phytochrome A-mediated blue light and UV-A-dependent chloroplast gene transcription in, 1957
  microbial pathogen resistance in, glucosinolate-derived isothiocyanates and, 1688
  mitochondria of, preprotein translocase in, 943
  photorespiration mutants of, 20
  phytochrome B inhibition of phytochrome A in, 1036
  psbD light-responsive promoter in, transcription factor of, 595
  research on, prehistory and history of, 15
  rhizobacteria-induced systemic resistance and ethylene signaling, 652
  roots of
    early response to ethylene, 519
    epidermal cell development in, phosphate and iron stress-induced alterations in, 2078
    gravitropic response of, interaction of chromosaponin and AUX1 protein in, 990
  seeds of, dormancy, germination, and longevity of, testa and, 1139
  starch-branching and -debranching enzymes of, molecular biology of, 1314
  stress tolerance in, glycinebetaine and, 180
  STURDY mutant cloning in, 573
  trehalose and trehalase in, 1086
Arabinogalactan proteins, glucosamine-containing, in carrot embryogenesis, 1880
Ascorbic acid biosynthesis, in *Pistia stratiotes*, 634
Aspartate kinase, in amino acid accumulation in maize endosperm, 1542, 1778
Astaxanthin biosynthesis, stress-induced, in green algae, 810
ATPase, vacuolar, aluminum-induced, in aluminum-resistant wheat, 2068
AUX1 protein, chromosaponin interaction with, effect on gravitropic response of Arabidopsis roots, 990
Auxin
  apical dominance and, in fava bean, 1546
  bioassay for, 1546
  polar transport of, triiodobenzoic acid inhibition of, 1547
  in Scots pine during earlywood/latewood transition, 2029
  in zinc-deficient plants, 1546
Avena sativa (*see* Oat)
Azospirillum spp., gibberellin synthesis and, in rice seedlings, 2053

B

B-Bolivia allele, in maize, retrotransposon-related sequence of, 1363
Bacillus thuringiensis, genetically engineered into maize, 1162
Bacterial artificial chromosomes, in barley and rice, 1156, 1342
Bacterial pathogens, cytochrome P450 monooxygenases induced by, in maize, 1126
bar gene, herbicide resistance and, 1541, 1585
Barley
  bacterial artificial chromosomes in, 1156, 1342
  chloroplasts of, hydrogen peroxide-mediated Ndh complex induction in, under photooxidative stress, 1450
  endosperms of, cytosolic ADP-glucose pyrophosphorylase in, 818
  enzyme structure of, 54
  freezing of, infrared video thermography of, 227
  genetic mapping of, 1155, 1236
  genomic sequencing of, 1166
  leaves of
    Mlo disease genetics in, 1163
    symplastic phloem unloading in, 209
  mildew resistance of, chromosomes in, 1155, 1236
  R-gene homolog reorganization in, 1163
  starch-branching and -debranching enzymes of, molecular biology of, 1153
  transgene expression stability in, 1154, 1354
Barrel medic, genomic sequencing of, 1166
Basil, peltate glands of, phenylpropene storage and biosynthesis in, 539
Bean (*see also* Fava bean; Lima bean; Soybean)
  cell walls of, hydrophobic interaction of GRP1.8 in, 673
  leaves of
    acid phosphatase induction in, phosphorus adaptation and, 1901
    cytosolic ammonium concentrations and transmembrane fluxes in, 523
    fosmidomycin-fed, isoprene and thermotolerance in, 1542, 2001
  root border cells of, aluminum toxicity and, 1978
Beechnut, seeds of, abscisic acid-induced protein phosphatase in, 1949
Benzoic acid, free and conjugated, in tobacco, salicylic acid synthesis and, 318
Betula occidentalis, stems of, cavitation fatigue in, 779
Bialaphos, resistance to, *bar* gene and, 1541, 1585
Biliverdin reductase, phytochrome chromophore deficiency induced by, in tobacco, 266
Biotin carboxyl carrier protein, tissue-specific expression of, in Arabidopsis, oilseed rape, and pea, 2016
Blue light
  14–3–3 binding to H^+-ATPase activated by, in fava bean guard cells, 1115
  phytochrome A-mediated, Arabidopsis chloroplast gene transcription dependent on, 1957
  pump current activation by, in fava bean guard cells, 329
Brachiaria decumbens (*see* Signalgrass)
Brassica napus (*see* Oilseed rape)
Brassica oleracea (*see* Broccoli; Cabbage; Cauliflower)
Brassicaceae
  biotin carboxyl carrier protein isoforms in, 2016
  self-incompatibility of, pollen specificity in, 2095
Brassinosteroids
  in Arabidopsis germination, 763
  zinnia cytodifferentiation and, 507, 556
Breeding of plants, changing paradigms in, 156
Broad bean (*see* Fava bean)
Broccoli, postharvest senescence in, 718
Brown algal kelp, oxidative burst in, oligoguluronate-elicited, 278
Bud development, in tobacco, adenine and, 1546
Bulbs, of iris, ribosome-inactivating proteins in, 866

C

C_4 plants, photosynthesis in, evolution of, 46
Cabbage, leaves of, cryoprotectin as lipid transfer protein homolog in, 835
Calcium
  cyclic ADP-ribose mobilized, in cauliflower florets, 2129
  cytosolic, in abscisic acid-induced actin reorganization, in dayflower guard cells, 2120
  membrane-bound protein kinase dependent on, in rice, low temperature activation of, 1442
  in tobacco cells, circadian rhythms of, 507, 787
Calcium flux, glutamate-gated, in Arabidopsis, 1139
Calendula officinalis, fatty acid conjugase encoded by, 847
Carbohydrates (*see also* Starch *entries*)
  in Scots pine during earlywood/latewood transition, 2029
Carbon nutrient, signaling by, 61
Carbon sink, missing, 25
Carbonic anhydrase, in *Acetabularia acetabulum*, 900
Carrot
  embryogenesis in, *N*-acetylglucosamine and arabinogalactan proteins in, 1880
  isoaspartyl methyltransferase biochemical properties in, 1023
Casein kinase 2, in salicylic acid-mediated transcription, in tobacco, 172, 396
Cation channels, in wheat roots, aluminum activation of, 1459
Cauliflower, florets of, cyclic ADP-ribose mobilized Ca^{2+} in, 2129
Cavitation fatigue, in xylem, 779
Cell death, programmed (*see* Apoptosis)
Cell identity, position and lineage in, 112
Cell walls
  acidification capacity of, in maize leaf elongation inhibition by salinity, 1419
  of bean, hydrophobic interaction of GRP1.8 in, 673
  cellular context of, 127
  structure and loosening of, 131
Ceratodon purpureus, protonemata of, amyloplast sedimentation in, 1542, 2085
Chaperonin, history of, 38
Chara globularis, gravisensing and gravitopism in, spectrin and Spitzenkörper effects on, 1541, 1611
Chickpea, ureidoglycolate degradation in, 828
Chicory, roots of, germacrene A carboxylic acid biosynthesis in, 1930
Chlamydomonas reinhardtii
  chloroplasts of, biogenesis of, 142
  diacylglyceryltrimethylhomoserine biosynthesis in, 423
  isoamylases of, amylopectin maturation and, 1723
  phytoglycogen production in, 1710
Chloroplast(s)
  of Arabidopsis
    phytochrome A-mediated blue light and UV-A-dependent gene transcription in, 1957
    protein import by, 1567
  of barley, hydrogen peroxide-mediated Ndh complex induction in, under photooxidative stress, 1450
  biogenesis of, 142
  of maize, non-photosynthetic ferredoxin precursor in, 2154
  origin and integration of, 50
  of tobacco, photosynthesis antimycin A sensitivity in, 1919
  of tomato, oxylipin-metabolizing P450s in, 306
  translation efficiency in, 430
Chloroplast proteases, in Arabidopsis, nomenclature for, 1912
Chromosaponin, interaction with AUX1 protein, effect on gravitropic response of Arabidopsis roots, 990
Chronobiology, progress in, 98
Cicer arietinum (*see* Chickpea)
Cichorium intybus (*see* Chicory)
Circadian rhythm
  of nitrate reductase, 1554
  of tobacco cytosolic calcium, 507, 787
Cold, activation of calcium-dependent protein kinase by, in rice, 1442
Cold acclimation
  of Arabidopsis, *RCI2A* and *RCI2B* regulation in, 1655
  new developments in, 89
  in wheat, actin-depolymerizing factor in, 360
Cold stress, glycinebetaine and, 180
Colobanthus quitensis, in Antarctica, effects of solar UV-B radiation and ozone hole on, 508, 738
Columella cells, of maize roots, gravitropic response and, 1045
Commelina communis (*see* Dayflower)
CONSTANS ortholog, in Japanese morning glory flowering, 1821
Corn (*see* Maize)
Cot curves, genomics and, 4
Cotton, farnesyl diphosphate conversion to sesquiterpene phytoalexins in, 1754

Cryoprotectin, as lipid transfer protein homolog, in leaves of cabbage and spinach, 835
Cryptogen, microtubule disruption and cell death induced by, in tobacco, 564
Cyanobacteria, Na^+/H^+ antiporter from, functional analysis of, 437
Cyclic ADP-ribose, Ca^{2+} mobilized by, in cauliflower florets, 2129
Cytochrome *c*, in sunflower roots and flowers, 1603
Cytochrome P450s, oxylipin-metabolizing, in tomato chloroplasts, 306
Cytochrome P450 monooxygenases, in maize, safeners and bacterial pathogen induction of, 1126
Cytokinin(s)
  structure/activity of, 1547
  tRNA and, 1547
Cytokinin oxidase, from maize, 378
Cytoskeleton, trekking along, 119

D

Daucus carota (*see* Carrot)
Dayflower, guard cells of, abscisic acid-induced actin reorganization in, 2120
3-Dehydroquinate dehydratase-shikimate: NADP oxidoreductase, in tomato, molecular characterization of, 1891
Deschampsia antarctica, in Antarctica, effects of solar UV-B radiation and ozone hole on, 508, 738
Development of plants, transcriptional networks in, 109
Diacylglyceryltrimethylhomoserine biosynthesis, in *Chlamydomonas reinhardtii*, 423
Diospyros kaki, stress tolerance in, glycinebetaine and, 180
Disease resistance, genetics in, 73
Diterpenes, subcellular compartmentation of, in rosemary leaves, 1094
DNA-damaging agents, effects on pea defense genes, 752

E

Ecological arsenal and developmental dispatcher, secondary metabolism in, 58
Elongation
  of Arabidopsis roots, ethylene and, 519
  of pea roots, aluminum in inhibition of, 199
Elongation factor 1α, in maize endosperm, 1155, 1271
Embryo, of maize, mitochondrial biogenesis in, 662
Embryogenesis, in carrot, *N*-acetylglucosamine and arabinogalactan proteins in, 1880
Endomembrane system, protein sorting problem and, 115
Endoplasmic reticulum domains, nodal, in in tobacco root tip gravity-sensing cells, 252
Endosperm
  graminaceous, cytosolic ADP-glucose pyrophosphorylase in, 818
  of maize
    amino acid accumulation in, genetic analysis of, 1542, 1766, 1778
    elongation factor 1α in, 1155, 1271
  of wheat, pea legumin overexpression in, paracrystalline matrix formation from, 1732
Enzyme structure, molecular modeling of, 54
Erwinia amylovora infection, pear oxidative stress during, 2164
Ethylene
  Arabidopsis mutant hypocotyl and stem response to, 507, 1061
  Arabidopsis root elongation and, 519
  rhizobacteria-induced signaling by, in Arabidopsis, 652
Ethylene response mutants, 81

F

Fagus sylvatica (*see* Beechnut)
Farnesyl diphosphate, conversion to sesquiterpene phytoalexins, in cotton, 1754
Fatty acid, in protection of *Synechococcus* against salt stress, 1842
Fatty acid conjugase, *Calendula officinalis* gene encoding, 847
Fatty acid hydroperoxide lyase, oxylipin-metabolizing, in tomato chloroplasts, 306
Fava bean
  apical dominance in, auxin and, 1546
  guard cells of
    blue light- and fusicoccin-activated 14–3–3 binding to H^+-ATPase in, 1115
    blue light-activated pump currents in, 329
    microtubules of, stomatal opening and, 172, 387
  synthesis of xenobiotic and amino acids in, 1620
Ferredoxin mRNA, in pea, light-regulated translation of, 770
Ferredoxin precursor, non-photosynthetic, in maize chloroplasts, 2154
Fertilization, in flowering plants, 102
Florets, of cauliflower, cyclic ADP-ribose mobilized Ca^{2+} in, 2129
Flowering
  of Arabidopsis and snapdragon, genes in, 1788
  fertilization in, 102
  of fuchsia
    blockage by gibberellin-induced assimilate competition, 172, 488
    nutrient drain hypothesis of, 172
  of Japanese morning glory, *CONSTANS* ortholog in, 1821
  of perennial ryegrass, *TERMINAL FLOWER1*-like gene in, 1517
  of sunflower, cytochrome *c* expression in, 1603
Fortified foods, phytoremediation and, 164
Fosmidomycin, bean leaves fed with, isoprene and thermotolerance in, 1542, 2001
Foxtail millet, R-gene homolog reorganization in, 1163
Freezing, of barley, infrared video thermography of, 227
FsPP2C1, abscisic acid-induced, in beechnut seeds, 1949
Fuchsia, flowering of
  blockage by gibberellin-induced assimilate competition, 172, 488
  nutrient drain hypothesis of, 172
Fuchsia hybrida (*see* Fuchsia)
Fusicoccin, 14–3–3 binding to H^+-ATPase activated by, in fava bean guard cells, 1115

G

Gas exchange, *Luzula sylvatica* ammonia compensation point and, 476
Gene(s), activation and silencing of, 145
Gene cloning, plant biology and, 4
Genetics
  in plant-pathogen interactions, 73
  synteny and, 152
Genomic sequencing, of rice, 1155, 1166
Germacrene A carboxylic acid biosynthesis, in chicory roots, 1930
Germination
  of Arabidopsis, brassinosteroids in, 763
  of Arabidopsis seeds, testa and, 1139
  of maize embryo, mitochondrial biogenesis during, 662
Gibberellin
  assimilate competition induced by, fuchsia flowering blockage by, 172, 488
  biosynthesis mutations of, pea root development and, 627
  breakdown and inflorescence formation in, in rice, 1153, 1508
  effect on reactive oxygen intermediate release in radish seeds, 1591
  synthesis of, *Azospirillum* spp. and, in rice seedlings, 2053
β-Glucan synthase, in tobacco pollen tubes, 2040
Glucosamine-containing arabinogalactan proteins, in carrot embryogenesis, 1880
Glucosinolate, isothiocyanates derived from, in Arabidopsis pathogen resistance, 1688
Glutamate, calcium fluxes gated by, in Arabidopsis, 1139
Glycine max (*see* Soybean)
Glycinebetaine, stress resistance and, 180
Golden rice, 1156, 1157
Gossypium barbadense (*see* Cotton)
Graminaceous endosperms, cytosolic ADP-glucose pyrophosphorylase in, 818
Grasses
  cytomolecular mapping of, 1154–1155, 1325
  evolutionary history of, 1155, 1198
  genetic system of, 1154, 1155, 1191, 1325
  active retrotransposons in, 1136, 1283
  Mutator transposase in, 1156, 1293
Gravitropic response
  of Arabidopsis roots, interaction of chromosaponin and AUX1 protein in, 990
  of *Chara globularis*, spectrin and Spitzenkörper effects on, 1541, 1611

of maize roots, columella cells in, 1045
of oat shoot pulvini, inositol trisphosphate and, 1499
Gravity-sensing cells, in tobacco root tips, nodal endoplasmic reticulum domains in, 252
Green algae
carbonic anhydrase in, 900
stress-induced astaxanthin biosynthesis in, 810
Growth-related genes, sugar regulation of, in rice, 877
GRP1.8, hydrophobic interaction of, in bean cell walls, 673
Guard cells
of dayflower, abscisic acid-induced actin reorganization in, 2120
of fava bean
blue light- and fusicoccin-activated 14–3–3 binding to H^+-ATPase in, 1115
blue light-activated pump currents in, 329
stomatal opening of, microtubules in, 172, 387
measuring volume and pressure of, 1577
in microtubules
of fava bean, stomatal opening and, 172
functions of, 387

H

H^+-ATPase
blue light activation of, in fava bean guard cells, 329
salt-induced vacuolar, in ice plant, 1643
Haematococcus pluvialis, stress-induced astaxanthin biosynthesis in, 810
Haustorium development, quinone-induced, in *Triphysaria*, 1870
Helianthus annuus (*see* Sunflower)
Herbicide resistance, *bar* gene and, 1541, 1585
Homeodomain leucine zipper protein, binding to *VspB* tripartite promoter, in soybean, 797
Hordeum vulgare (*see* Barley)
Hormone response mutants, 81
Hsp70s, in spinach leaves, light/dark regulation of, 1633
Hydrogen peroxide, barley chloroplast Ndh complex induction mediated by, under photooxidative stress, 1450
Hypocotyl, of Arabidopsis mutant, ethylene response of, 507, 1061

I

Ice plant
salt stress in, potassium channel expression during, 604
salt-induced vacuolar H^+-ATPase in, 1643
Indoleacetic acid
pith parenchyma treated with, vascular tissue and, 1546
turnover of, in Scots pine seedlings, 464
Infection, from *Erwinia amylovora*, pear oxidative stress during, 2164
Infrared video thermography, of barley freezing, 227
Inositol trisphosphate, in gravitropic response of oat shoot pulvini, 1499
myo-Inositol-3-phosphate synthase, expression in soybean, 1941
Insect saliva, on tobacco
fatty acid-amino acid conjugates in, 508, 711
transcript accumulation and, 508, 683, 701
Interphase, telomere organization in, 532
Ion transport, in higher plants, 139
Ipomoea batatas (*see* Sweet potato)
Iris, bulbs of, ribosome-inactivating proteins in, 866
Iris hollandica (*see* Iris)
Iron stress, root epidermis and
in Arabidopsis roots, 2078
in tomato and pea, 1679
Isoamylases, of *Chlamydomonas reinhardtii*, amylopectin maturation and, 1723
Isoaspartyl methyltransferase, biochemical properties of, in higher plants, 1023
Isoprene, thermotolerance and, in fosmidomycin-fed bean leaves, 1542, 2001
Isothiocyanates, glucosinolate-derived, in Arabidopsis pathogen resistance, 1688

J

Japanese morning glory, flowering of, *CONSTANS* ortholog in, 1821
Jasmonate signaling, in lima bean, ion channel-forming alamethicin and, 369

K

Kelp, oxidative burst in, oligoguluronate-elicited, 278
Kernels, of maize, amino acid biosynthesis and intermediary metabolism in, 1178
3-Ketoacyl-acyl-carrier protein synthase, lipid synthesis and, in rapeseed seeds, 1103
Kinetin, isolation and description of, 1546
KNOTTED1 gene mutations, in maize, 1162

L

Laminaria digitata (*see* Brown algal kelp)
Lc transcriptional activator, in maize, translational repression of, 1380
Leaves
of Arabidopsis, phytochrome A-mediated blue light and UV-A-dependent chloroplast gene transcription in, 1957
of barley
Mlo disease genetics in, 1163
symplastic phloem unloading in, 209
of bean
acid phosphatase induction in, phosphorus adaptation and, 1901
fosmidomycin-fed, isoprene and thermotolerance in, 1542, 2001
of cabbage, cryoprotectin as lipid transfer protein homolog in, 835
of maize, elongation of, salinity-induced inhibition of, 1419
of *Prunus laurocerasus*, xylem cavitation in, 1700
of rosemary, diterpene subcellular compartmentation in, 1094
of spinach
cryoprotectin as lipid transfer protein homolog in, 835
Hsp70 expression in, light/dark regulation of, 1633
of tobacco
photosynthetic capacity of, sedoheptulose-1,7-bisphosphatase activity and, 982
protein movement through plasmodesmata in, 1541, 1808
of *Tradescantia virginiana*, gas exchange in, abscisic acid effects on, 935
LeDI-2 protein, *Lithospermum erythrorhizon* root-specific metabolism and, 1831
Leghemoglobin genes, in pea root nodules, 641
Legumes, *Rhizobium* symbiosis with, genes and signals in, 69
Legumin, of pea, overexpression in wheat endosperm, paracrystalline matrix formation from, 1732
Lepidoptera saliva, on tobacco
fatty acid-amino acid conjugates in, 508, 711
molecular interaction with, 2189
transcript accumulation and 508, 683, 701
Light (*see also* Blue light; Ultraviolet *entries*)
effect on reactive oxygen intermediate release in radish seeds, 1591
excess, 29
non-photochemical quenching and, 1558
in pea stem osmoregulation, 1854
regulation of pea cell division and nucleolin by, 339
regulation of pea ferredoxin mRNA translation by, 770
regulation of *psbA* and *psaE* by, in *Synechocystis*, 1988
regulation of spinach leaf Hsp70 expression by, 1633
Light-responsive promoter, in Arabidopsis, transcription factor of, 595
Lima bean, jasmonate and salicylate signaling in, ion channel-forming alamethicin and, 369
Lipid peroxidation, in pea root elongation inhibition, 199
Lipid synthesis
in *Chlamydomonas reinhardtii*, 423
3-ketoacyl-acyl-carrier protein synthase and, in rapeseed seeds, 1103
Lipid transfer protein homolog, cryoprotectin as, in leaves of cabbage and spinach, 835
Liriodendron tulipifera (*see* Tulip tree)
Lithospermum erythrorhizon, root-specific metabolism in, LeDI-2 protein and, 1831
Lolium perenne (*see* Ryegrass, perennial)
Lolium temulentum genes, Arabidopsis floral development and, 1788
Lophopyrum elongatum (*see* Wheatgrass)

Luzula sylvatica, ammonia compensation point in, gas exchange and bioassay determinations of, 476
Lycopersicon esculentum (*see* Tomato)

M

Maize
aluminum-induced anion channels in, 292
amyloplast stroma of, plastidic starch phosphorylase in, 351
aquaporin protein family in, 1206
B-Bolivia allele in, retrotransposon-related sequence of, 1363
Bacillus thuringiensis genetically engineered into, 1162
chloroplasts of
biogenesis of, 142
non-photosynthetic ferredoxin precursor in, 2154
chromosomes of, added to oat genome, 1154–1155, 1216, 1228
cytochrome P450 monooxygenases in, safeners and bacterial pathogen induction of, 1126
cytokinin oxidase from, 378
domestication of, molecular biology of, 1163
embryos of, mitochondrial biogenesis in, 662
endosperm of
amino acid accumulation in, genetic analysis of, 1542, 1766
elongation factor 1α in, 1155, 1271
genomic sequencing of, 1166
isoaspartyl methyltransferase biochemical properties in, 1023
kernels of, amino acid biosynthesis and intermediary metabolism in, 1178
KNOTTED1 gene mutations in, 1162
leaf elongation in, salinity-induced inhibition of, 1419
mapping sequences of, 1154–1155, 1228
nested retrotransposons in, 1162
nitrate reductase circadian system in, 1554
nitrogen use efficiency in, genetic and physiological basis of, 1155, 1258
oat cross with, 1153
opaque-2 gene in, as transcription factor, 1162
quantitative trait loci in, 1162
ribonuclease P of, bipartite substrate cleavage by, 1187
root of
elongation of, *SLR1* and *SLR2* in, 1529
gravitropic response of, columella cells in, 1045
root tips of
mannose regulation of protein degradation and protease expression in, 1485
sucrose synthase and anoxia-induce death of, 585
starch-branching and -debranching enzymes of, molecular biology of, 1153, 1314, 1396, 1406
sugary1 locus in, 1153, 1406
transcriptional activator *Lc* in, translational repression of, 1380
transposable elements in, 149
β-ureidopropionase in, characterization of, 1001
viviparous-1 gene in, as transcriptional activator, 1162
Malate-permeable channels, in wheat roots, aluminum activation of, 1459
Manduca sexta saliva, on tobacco
fatty acid-amino acid conjugates in, 508, 711
transcript accumulation and, 508, 683, 701
Mannose, in regulation of protein degradation and protease expression in maize root tips, 1485
Medicago truncatula, apyrase genes from, 2104
Meiosis, telomere organization in, 532
Membrane lipid biosynthesis, in *Chlamydomonas reinhardtii*, 423
Mesembryanthemum crystallinum (*see* Ice plant)
Metabolic engineering, 160
Metabolism, secondary, 58
Metabolite signaling, 61
Methylation, during salt stress, adenosine kinase in, in spinach, 856
Microtubules
cryptogen-induced disruption of, in tobacco, 564
in guard cells
functions of, 387
stomatal opening and, in fava bean, 172
Mimosa, motor organ of, potassium-efflux channels of, 1139, 1142
Minovincinine-19-hydroxy-*O*-acetyltransferase, in periwinkle roots, 189
Mitochondria
of Arabidopsis, preprotein translocase in, 943
biogenesis of, during maize embryo germination, 662
of wheat, aluminum-induced ATP synthase in, 2068
Mitochondrial proteases, in Arabidopsis, nomenclature for, 1912
Mlo disease, in barley leaves, 1163
Models
of photosynthesis, 42
of plant enzyme structure, 54
Monsanto draft rice genome sequence, in research, 1164
Moss, protonemata of, amyloplast sedimentation in, 1542, 2085
Mutator transposase, in grasses, 1156, 1293
Myo-inositol-3-phosphate synthase, expression in soybean, 1941

N

Na^+/H^+ antiporter, from cyanobacteria, functional analysis of, 437
Ndh complex induction, hydrogen peroxide-mediated, in barley chloroplasts, under photooxidative stress, 1450
NH_4+/NH_3, cytosolic concentrations and transmembrane fluxes of, in bean leaves, 523
Nicotiana spp. (*see* Tobacco)
Nicotine, accumulation of, herbivore effect on, 2189
Nitrate reductase, circadian system of, 1554
Nitrogen, efficient use of in maize, genetic and physiological basis of, 1155, 1258
Nitrogen nutrient, signaling by, 61
Nonsense-mediated decay, of rice *waxy* mutant, 1388
ntcA gene, redox control of, in *Synechocystis* sp., 969
Nuclear degradation, triggered by vacuole rupture, in zinnia apoptosis, 507, 615
Nuclear distortion, induction by DNA-damaging agents, in peas, 752
Nutrient drain hypothesis of flowering, in fuchsia, 172, 488

O

Oat
genomes of, maize chromosome addition to, 1154–1155, 1216, 1228
maize cross with, 1153
shoot pulvini of, gravitropic signaling in, inositol trisphosphate in, 1499
Ocimum basilicum (*see* Basil)
Oilseed rape
biotin carboxyl carrier protein tissue-specific expression in, 2016
seeds of, 3-ketoacyl-acyl-carrier protein synthase and lipid synthesis in, 1103
stress tolerance in, glycinebetaine and, 180
Opaque-2 gene, in maize
endosperm amino acid accumulation and, genetic analysis of, 1542, 1766, 1778
as transcription factor, 1162
Oryza sativa (*see* Rice)
OsTATC gene, tagging of, in rice, 1156, 1248
Oxalic acid biosynthesis, in *Pistia stratiotes*, 634
Oxidative burst, oligoguluronate-elicited, in brown algal kelp, 278
Oxidative stress, in pear, in *Erwinia amylovora* infection, 2164
Oxylipin-metabolizing P450s, in tomato chloroplasts, 306
Ozone hole, effect on vascular plants in Antarctica, 508, 738

P

Palatinose, in potato tuber sucrose degradation and starch synthesis, 1967
Pathogens, plant interactions with, genetics of, 73
Pea
biotin carboxyl carrier protein tissue-specific expression in, 2016
de-etiolation of, light regulation of cell division and nucleolin during, 339
defense genes of, effects of DNA-damaging agents on, 752
ferredoxin mRNA, light-regulated translation of, 770
legumin of, overexpression in wheat endosperm, paracrystalline matrix formation from, 1732

root nodules of, leghemoglobin genes in, 641
root(s) of
development of, gibberellin biosynthesis mutations and, 627
elongation inhibition in, aluminum and, 199
iron stress and, 1679
stems of, light-dependent osmoregulation in, 1854
vacuole development in, tonoplast Rop GTPases during, 241
Pear, oxidative stress in, in *Erwinia amylovora* infection, 2164
Peltate glands, of basil, phenylpropene storage and biosynthesis in, 539
Periwinkle, roots of, minovincinine-19-hydroxy-O-acetyltransferase in, 189
Petunia, intragenic recombination of S-RNase gene in, 1012
Petunia inflata (*see* Petunia)
pH changes, cytoplasmic, during anaerobic stress, in sycamore, 912
Pharbitis nil (*see* Japanese morning glory)
Phaseolus lunatus (*see* Lima bean)
Phaseolus vulgaris (*see* Bean)
Phenylpropenes, in basil peltate glands, storage and biosynthesis of, 539
Phloem loading, in tulip tree, 891
Phloem unloading, symplastic, in barley leaves, 209
Phosphate stress, and epidermal cell development in Arabidopsis roots, 2078
Phosphorus adaptation, bean leaf acid phosphatase and, 1901
Phosphorus starvation, in tomato, acid phosphatase induced by, 728
Photomorphogenesis, photoreceptors in, 85
Photooxidative stress, barley chloroplast Ndh complex induction mediated by hydrogen peroxide in, 1450
Photoreceptors, in plant photomorphogenesis, 85
Photorespiration, in Arabidopsis mutants, 20
Photosynthesis
antimycin A sensitivity to, in tobacco chloroplasts, 1919
in C_4 plants, evolution of, 46
models of, 42
salt stress-induced damage to, in *Synechococcus*, fatty acids in protection against, 1842
Photosynthetic capacity, sedoheptulose-1,7-bisphosphatase activity and, in tobacco leaves, 982
Photosynthetic reaction centers, 33
Photosystem I, excitation of, active oxygen produced during, in spinach, 2007
Phytic acid biosynthesis, soybean *myo*-inositol-3-phosphate synthase expression and, 1941
Phytochrome A, in blue light and UV-A-dependent Arabidopsis chloroplast gene transcription, 1957
Phytochrome B, phytochrome A inhibition by, in Arabidopsis, 1036
Phytochrome chromophore deficiency, biliverdin reductase-induced, in tobacco, 266
Phytoglycogen production, in *Chlamydomonas reinhardtii*, 1710
Phytoremediation, fortified foods and, 164
Pine (*see also* Scots pine)
Pinus sylvestris (*see* Scots pine)
Pistia stratiotes, oxalic acid biosynthesis in, 634
Pistil, extensin-like proteins specific to, in tobacco, 2180
Pisum sativum (*see* Pea)
Pith parenchyma, indoleacetic acid treatment of, vascular tissue and, 1546
Plant cells (*see* Cell *entries*)
Plant physiology, past, present, and future of, 1
Plasmodesmata, 123
protein movement through, in tobacco leaves, 1541, 1808
Plastid(s)
of potato, sucrose metabolism in, 926
of tobacco, sucrose metabolism in, 926
Plastidic starch phosphorylase, in maize amyloplast stroma, 351
Pollen specificity, in *Brassicaceae* self-incompatibility, 2095
Pollen tubes, of tobacco, β-glucan synthase expression in, 2040
Polyamine metabolism, in poplar cells, 2139
Polypeptide hormones, 65
Polysaccharide biosynthesis, in plants, three-dimensional structures of UDP-sugar glycosyltransferases and, 527
Poplar, stems of, cavitation fatigue in, 779
Poplar cells, polyamine metabolism in, 2139
Population/biodiversity paradox, 174
Populus (*see* Poplar)
Positron emitting tracer imaging system (PETIS), in real time visualization of ^{13}-translocation of rice, 1743
Potassium channel, expression of during salt stress, in ice plant, 604
Potassium-efflux channels, of mimosa motor organ of, 1139, 1142
Potato
genomic sequencing of, 1166
plastids of, sucrose metabolism in, 926
tubers of
physiology and starch properties of, adenylate transporter activity and, 1667
sucrose degradation and starch synthesis in, palatinose and, 1967
Preprotein translocase, of Arabidopsis mitochondria, 943
Programmed cell death (*see* Apoptosis)
Protease
chloroplast and mitochondrial, nomenclature for, 1912
mannose-regulated expression of, in maize root tips, 1485
Protein
import of, by Arabidopsis chloroplasts, 1567
mannose-regulated degradation of, in maize root tips, 1485
movement through tobacco leaf plasmodesmata, 1541, 1808
sorting of, endomembrane system and, 115
Protein kinase
in abscisic acid-induced actin reorganization, in dayflower guard cells, 2120
calcium-dependent, in rice, low temperature activation of, 1442
Protein kinase CK2, nuclear, salicylic acid activation of, 173, 396
Protein kinase gene *Esi47*, hormone signaling and, in salt-tolerant wheatgrass, 1429
Protein phosphatase, in abscisic acid-induced actin reorganization, in dayflower guard cells, 2120
Proton pump, to proteome, 139
Protonemata, of moss, amyloplast sedimentation in, 1542, 2085
Prunus laurocerasus, leaves of, xylem cavitation in, 1700
psbD light-responsive promoter, in Arabidopsis, transcription factor of, 595
Pseudomonas aeruginosa citrate synthase gene, in tobacco, 2059
Pyrus communis (*see* Pear)

Q

Quantitative trait loci, in maize, 1162
Quinone, haustorium development induced by, in *Triphysaria*, 1870

R

Radish, seeds of, reactive oxygen intermediate release in, effects of light, gibberellin, and abscisic acid on, 1591
Rape (*see* Oilseed rape)
Raphanus sativus (*see* Radish)
RCI2A and *RCI2B* genes, in cold acclimation of Arabidopsis, 1655
Receptor-like kinase genes, in hexaploid wheat, 1156, 1304
Redox, *ntcA* gene controlled by, in *Synechocystis* sp., 969
Resistance R-gene homologs, rapid reorganization of, 1163
Retrotransposon(s)
active, in grass genomes, 1156, 1283
nested, in maize, 1162
Retrotransposon *Tos17*, insertion in rice, viviparous mutants generated by, 1156, 1248
Retrotransposon-related sequence, of *B-Bolivia* allele in maize, 1363
Rhizobacteria, systemic resistance and ethylene signaling induced by, in Arabidopsis, 652
Rhizobium, legume symbiosis with, genes and signals in, 69
Ribonuclease P, of rice and maize, bipartite substrate cleavage by, 1187
Ribosome-inactivating proteins, in iris bulbs, 866
Rice
bacterial artificial chromosomes in, 1156, 1342
cloning disease resistance gene in, 1162
gibberellin breakdown and inflorescence formation in, 1153, 1508
golden, 1156, 1157
growth- and stress-related genes in, sugar regulation of, 877
isoaspartyl methyltransferase biochemical properties in, 1023

membrane-bound calcium-dependent protein kinase in, low temperature activation of, 1442
Monsanto draft genome sequence in, 1164
R-gene homolog reorganization in, 1163
retrotransposon *Tos17* insertion in, viviparous mutants generated by, 1156, 1248
ribonuclease P of, bipartite substrate cleavage by, 1187
salt tolerance in, quantitative trait loci for, 406
seedlings of, *Azospirillum* spp. and gibberellin synthesis in, 2053
starch-branching and -debranching enzymes of, molecular biology of, 1153
stress tolerance in, glycinebetaine and, 180
submergence response in, 955
^{13}-translocation of, real time visualization of, 1743
transposon insertional mutagenesis in, 1156, 1175
waxy mutant in, nonsense-mediated decay of, 1388
zeaxanthin epoxidase and *OsTATC* genes in, 1156, 1248
Rice Genome Sequencing Project, 1155, 1166
Root(s)
of Arabidopsis
early response to ethylene, 519
epidermal cell development in, phosphate and iron stress-induced alterations in, 2078
gravitropic response of, interaction of chromosaponin and AUX1 protein in, 990
of chicory, germacrene A carboxylic acid biosynthesis in, 1930
Lithospermum erythrorhizon metabolism in, LeDI-2 protein and, 1831
of maize
elongation of, *SLR1* and *SLR2* in, 1529
gravitropic response of, columella cells in, 1045
of pea
development of, gibberellin biosynthesis mutations and, 627
elongation inhibition in, aluminum and, 199
iron stress and, 1679
of periwinkle, minovincinine-19-hydroxy-*O*-acetyltransferase in, 189
of sunflower, cytochrome *c* expression in, 1603
of tomato, iron stress and, 1679
of wheat, aluminum activation of malate-permeable and cation channels in, 1459
Root border cells, of bean, aluminum toxicity and, 1978
Root nodules, of pea, leghemoglobin genes in, 641
Root tips
of maize
mannose regulation of protein degradation and protease expression in, 1485
sucrose synthase and anoxia-induced death of, 585
of tobacco, gravity-sensing cells in, nodal endoplasmic reticulum domains in, 252
Rop GTPases, in pea tonoplast during vacuole development, 241
Rosemary, leaves of, diterpene subcellular compartmentation in, 1094
Rosmarinus officinalis (*see* Rosemary)
Ryegrass, perennial, floral transition and axillary meristem identity in, *TERMINAL FLOWER1*-like gene in, 1517

S

S-RNase gene, intragenic recombination of, in petunia, 1012
Safeners, cytochrome P450 monooxygenases induced by, in maize, 1126
Salicylic acid
activation of, nuclear protein kinase CK2 and, 173
signaling by, in lima bean, ion channel-forming alamethicin and, 369
synthesis of, in tobacco, free and conjugated benzoic acid and, 318
transcription mediated by, casein kinase 2 in, in tobacco, 396
Salinity, maize leaf elongation inhibition by, 1419
Salt stress
glycinebetaine and, 180
in ice plant, potassium channel expression during, 604
methylation activities during, adenosine kinase in, in spinach, 856
in *Synechococcus*, fatty acids in protection against, 1842
Salt tolerance
in rice, quantitative trait loci for, 406
in wheatgrass, protein kinase gene *Esi47* and hormone signaling in, 1429
Samanea saman (*see* Mimosa)
Scientific literature, interpretation of, by scientific and lay communities, 509
Scots pine
earlywood/latewood transition in, auxin and carbohydrates during, 2029
seedlings of, indoleacetic acid turnover in, 464
Sedoheptulose-1,7-bisphosphatase activity, photosynthetic capacity and, in tobacco leaves, 982
Seedlings
of rice, *Azospirillum* spp. and gibberellin synthesis in, 2053
of Scots pine, indoleacetic acid turnover in, 464
Seeds
of Arabidopsis, dormancy, germination, and longevity of, testa and, 1139
of beechnut, abscisic acid-induced protein phosphatase in, 1949
of radish, reactive oxygen intermediate release in, effects of light, gibberellin, and abscisic acid on, 1591
of rapeseed, 3-ketoacyl-acyl-carrier protein synthase and lipid synthesis in, 1103
Self-incompatibility
in *Brassicaceae*, pollen specificity in, 2095
recognizing self in, 105
Senescence, postharvest, in broccoli, 718
Sesquiterpene lactone biosynthesis, in chicory roots, 1930
Sesquiterpene phytoalexins, farnesyl diphosphate conversion to, in cotton, 1754
Setaria italica (*see* Foxtail millet)
Shoot pulvini, of oat, gravitropic signaling in, inositol trisphosphate in, 1499
Short lateral roots1 and *2* genes, in maize root elongation, 1529
Signalgrass, aluminum resistance in, 1473
Snapdragon, floral development in, genes in, 1788
Solanum tuberosum (*see* Potato)
Sorghum
evolutionary history of, 1155, 1325
genomics of, 1154–1155, 1166, 1325
Soybean
myo-inositol-3-phosphate synthase expression in, 1941
VspB tripartite promoter in, homeodomain leucine zipper protein binding to, 797
Spectrin, *Chara globularis* gravitropism and, 1541, 1611
Sphingidae saliva, on tobacco
fatty acid-amino acid conjugates in, 508, 711
molecular interaction with, 2189
transcript accumulation and, 508, 683, 701
Spinach
leaves of
cryoprotectin as lipid transfer protein homolog in, 835
Hsp70 expression in, light/dark regulation of, 1633
photosystem I excitation in, active oxygen produced during, 2007
salt-stressed, maintaining methylation during, adenosine kinase in, 856
Spinacia oleracea (*see* Spinach)
Spitzenkörper, *Chara globularis* gravitropism and, 1541, 1611
Starch, of potato tubers with altered plastidic adenylate transporter activity, 1667
Starch phosphorylase, plastidic, in maize amyloplast stroma, 351
Starch synthesis, in potato tubers, palatinose and, 1967
Starch-branching and -debranching enzymes, molecular biology of
in maize, 1153, 1314, 1396, 1406
in wheat, 1153, 1314
Stems
of Arabidopsis mutant, ethylene response of, 507, 1061
of pea, light-dependent osmoregulation in, 1854
of poplar, cavitation fatigue in, 779
of sunflower, turgor-induced elastic strain in, 2173
Stomatal development and mechanics, abscisic acid effects on, in *Tradescantia virginiana*, 935
Stomatal opening, in fava bean guard cells, microtubules in, 172, 219
Stress tolerance (*see also specific stressor*)
glycinebetaine and, 180
Stress-related genes, sugar regulation of, in rice, 877
Submergence response, in rice, 955

Sucrose degradation, in potato tubers, palatinose and, 1967
Sucrose metabolism, in potato and tobacco plastids, 926
Sucrose synthase, in anoxia-induced death of maize root tips, 585
Sugar, regulation of growth- and stress-related genes by, in rice, 877
Sunflower
  flowers of, cytochrome *c* expression in, 1603
  roots of, cytochrome *c* expression in, 1603
  stems of
    cavitation fatigue in, 779
    turgor-induced elastic strain in, 2173
Sweet potato, vacuolar protein precursor in, 447
Sycamore, anaerobic stress in, cytoplasmic pH changes during, 912
Synechococcus
  salt-induced damage in, fatty acids in protection against, 1842
  stress tolerance in, glycinebetaine and, 180
Synechocystis
  light regulation of *psbA* and *psaE* in, 1988
  Na^+/H^+ antiporter from, functional analysis of, 437
  redox control of *ntcA* gene in, 969
Synteny, genomics and, 152

T

Technical materials, plants as factories for, 168
Telomeres, polar arrangement of, in interphase and meiosis, 532
TERMINAL FLOWER1-like gene, in perennial ryegrass floral transition and axillary meristem identity, 1517
Tetracycline repressor, in tobacco Bright Yellow 2 cell line, 1548
Thermography, infrared video, of barley freezing, 227
Thermotolerance, isoprene and, in fosmidomycin-fed bean leaves, 1542, 2001
Tissue culture medium, perfection of, 1547
Tobacco
  bar gene in, herbicide resistance and, 1541, 1585
  biliverdin reductase-induced phytochrome chromophore deficiency in, 266
  Bright Yellow 2 cell line of, tetracycline repressor in, 1548
  bud development in, adenine and, 1546
  chloroplasts of
    biogenesis of, 142
    photosynthesis antimycin A sensitivity in, 1919
  cryptogen-induced microtubule disruption and cell death in, 564
  cytosolic calcium in, circadian rhythms of, 507, 787
  free and conjugated benzoic acid in, salicylic acid synthesis and, 318
  leaves of
    photosynthetic capacity of, sedoheptulose-1,7-bisphosphatase activity and, 982
  protein movement through plasmodesmata in, 1541, 1808
Lepidoptera saliva on
  fatty acid-amino acid conjugates in, 508, 711
  molecular interaction with, 2189
  transcript accumulation and, 508, 683, 701
nitrate reductase circadian system in, 1554
pistil-specific extensin-like proteins from, 2180
plastids of, sucrose metabolism in, 926
pollen tubes of, β-glucan synthase expression in, 2040
Pseudomonas aeruginosa citrate synthase gene in, 2059
root tips of, gravity-sensing cells in, nodal endoplasmic reticulum domains in, 252
salicylic acid-mediated transcription in, casein kinase 2 in, 172, 396
stress tolerance in, glycinebetaine and, 180
Tomato
  chloroplasts of, oxylipin-metabolizing P450s in, 306
  3-dehydroquinate dehydratase-shikimate:NADP oxidoreductase in, molecular characterization of, 1891
  genomic sequencing of, 1166
  phosphorus starvation in, acid phosphatase induced by, 728
  roots of, iron stress and, 1679
Tradescantia virginiana, abscisic acid effects on stoma and leaf gas in, 935
Transcriptional activator *Lc*, in maize, translational repression of, 1380
Transcriptional networks, in plant development, 109
Transgenes
  expression stability of, in barley, 1154, 1354
  wandering, 1543
Translation efficiency, in chloroplasts, 430
Transposable elements, 149
Transposon insertional mutagenesis, in rice, 1156, 1175
Trehalose metabolism, in Arabidopsis, 1086
Triiodobenzoic acid, auxin polar transport inhibition by, 1547
Triphysaria, quinone-induced haustorium development in, 1870
Tritium aestivum (*see* Wheat)
tRNA, cytokinins and, 1547
Tubers, of potato
  physiology and starch properties of, adenylate transporter activity and, 1667
  sucrose degradation and starch synthesis in, palatinose and, 1967
Tulip tree, phloem loading in, 891

U

UDP-sugar glycosyltransferases, three-dimensional structures of, plant polysaccharide biosynthesis and, 527
Ultraviolet-A radiation, phytochrome A-mediated, Arabidopsis chloroplast gene transcription dependent on, 1957
Ultraviolet-B radiation, effect on vascular plants in Antarctica, 508, 738
Ureidoglycolate degradation, in chickpea, 828
β-Ureidopropionase, in maize, characterization of, 1001

V

Vacuolar ATPase, aluminum-induced, in aluminum-resistant wheat, 2068
Vacuolar H^+-ATPase, salt-induced, in ice plant, 1643
Vacuolar protein precursor, in sweet potato, 447
Vacuole development, in pea, tonoplast Rop GTPases during, 241
Vacuole rupture, rapid nuclear degradation triggered by, in zinnia apoptosis, 507, 615
Vascular tissue, of indoleacetic acid-treated pith parenchyma, 1546
Vicia faba (*see* Fava bean)
Viviparous mutants, generated by retrotransposon *Tos17* insertion in rice, 1156, 1248
Viviparous-1 gene, in maize, as transcriptional activator, 1162
VspB tripartite promoter, in soybean, homeodomain leucine zipper protein binding to, 797

W

Wall of cell (*see* Cell wall)
Water relations of plants, aquaporins in, 135
waxy mutant, in rice, nonsense-mediated decay of, 1388
Wheat
  aluminum-resistant, aluminum induction of vacuolar ATPase and mitochondrial ATP synthase in, 2068
  cold acclimation of, actin-depolymerizing factor in, 360
  endosperm of, pea legumin overexpression in, paracrystalline matrix formation from, 1732
  genomic sequencing of, 1166
  hexaploid, receptor-like kinase genes in, 1156, 1304
  roots of, aluminum activation of malate-permeable and cation channels in, 1459

starch-branching and -debranching enzymes of, molecular biology of, 1153, 1314

zinc uptake in, 456

Wheatgrass, salt-tolerant, protein kinase gene *Esi47* and hormone signaling in, 1429

Wilderness, saving of, agricultural efficiency in, 174

X

Xenobiotic, amino acid synthesis with, for fava beans, 1620

Xylem, cavitation of, 779
in *Prunus laurocerasus* leaves, 1700

Z

Zea mays (*see* Maize)

Zeaxanthin epoxidase gene, tagging of, in rice, 1156, 1248

Zinc deficiency, auxin level in, 1546

Zinc uptake, in wheat, 456

Zinnia

cytodifferentiation in, brassinosteroids and, 507, 556

vacuole rupture in, rapid nuclear degradation triggered by, in apoptosis, 507, 615

Zinnia elegans (*see* Zinnia)
